**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 requires that all three components, a,b and c, be present, however, claims 5 and 6 indicate that that 0% of component c is possible which renders the claims indefinite.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 rejected under 35 U.S.C. 103(a) as being unpatentable over Grollier et al. for the reasons of record set forth in the prior Office Actions and the further reasons below.

Grollier et al (U.S. 4,240,450) was discussed in the prior Office Actions and the same is incorporated herein.

Examiner had duly considered Applicant's arguments but deems them unpersuasive.

Applicant argues that there is no hint or suggestion that such compositions would provide flexible and good holding film texture. However, the prior art does suggest good flexibility and holding film texture (Grollier et al., Column 2, lines 50-64). Applicant argues that that the

Art Unit: 1616

criticality of the claimed ranges has been shown by the Declaration of Takanori Nambu.

However, said declaration only tests a single embodiment, does not indicate the solvent(s) used and tests against the other components singly whereas the prior art expressly discloses a mixture of two polymers, whereas the generic claim claims any anionic polymer, any cationic polymer and any amphoteric polymer and any solvent and the dependent claims are similarly broad in nature. Thus, the declaration does not appear to be commensurate in scope with the scope of the claims. As such, said declaration does not appear to overcome the rejection herein.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kajino et al. (U.S. Pat. 5,254,333) for the reasons of record set forth in the prior Office Action (1/11/01) and the further reasons below.

Kajino et al. was discussed in the prior Office Action (1/11/01) and the same are incorporated herein.

Examiner has duly considered Applicant's arguments but deems them unpersuasive.

Applicant argues that there is no hint or suggestion that such compositions would provide flexible and good holding film texture. However, the prior art does suggest good flexibility and holding film texture (Kajino et al., Columns 13, 14). Applicant argues that that the criticality of the claimed ranges has been shown by the Declaration of Takanori Nambu. However, said declaration only tests a single embodiment and does not indicate the solvent(s) used, whereas the generic claim claims any anionic polymer, any cationic polymer and any amphoteric polymer and any solvent and the dependent claims are similarly broad in nature. Thus, the declaration does not appear to be commensurate in scope with the scope of the claims. As such, said declaration does not appear to overcome the rejection herein.

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
